**Re: City of Farmington Hills Employees' Retirement System Actuarial Valuation as of June 30, 2021
Actuarial Disclosures**

Ladies and Gentlemen:

The results of the June 30, 2021 Annual Actuarial Valuation of the City of Farmington Hills Employees' Retirement System (System) are presented in this report. The purpose of this valuation is to measure the System's funding progress and to determine the employer contribution for the fiscal year beginning July 1, 2022. This report should not be relied on for any purpose other than the purposes described herein. Determinations of financial results, associated with the benefits described in this report, for purposes other than those identified above may be significantly different.

This report was prepared using the assumptions and methods adopted by the Board and is intended for use by the System and those designated or approved by the Board. This report may be provided to parties other than the System only in its entirety and only with the permission of the Board. GRS is not responsible for unauthorized use of this report.

The findings in this report are based on data and other information through June 30, 2021. This valuation was based upon information furnished by the System, concerning Retirement System benefits, financial transactions, plan provisions and active members, terminated members, retirees and beneficiaries. We checked the information provided for internal reasonability and year-to-year consistency, but did not audit the data. As a result, we are not able to take responsibility for the accuracy or completeness of the information provided to GRS.

This report includes risk metrics shown on page E-1 but does not include a more robust assessment of the risk of future experience not meeting actuarial assumptions. Additional assessment of risks was outside of the scope of this assignment. We encourage a review and assessment of investment and other significant risks which may have a material effect on the System's financial condition.

This report was prepared using our proprietary valuation model and related software which, in our professional judgment, has the capability to provide results that are consistent with the purposes of the valuation and has no material limitations or known weaknesses. We performed tests to ensure that the model reasonably represents that which is intended to be modeled.

This report reflects the impact of COVID-19 through June 30, 2021. It does not reflect the ongoing impact of COVID-19, which is likely to influence demographic and economic experience, at least in the short term. We will continue to monitor these developments and their impact on the Retirement System. Actual future experience will be reflected in each subsequent annual valuation, as experience emerges.

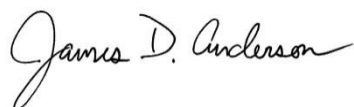

This valuation assumes the continuing ability of the plan sponsor to make the contributions necessary to fund this plan. A determination regarding whether or not the plan sponsor is actually able to do so is outside our scope of expertise and was not performed. The employer contributions shown in Section B may be considered a minimum contribution that complies with the Board's funding policy and state law. Users of this report should be aware that contributions made at this level do not guarantee benefit security. Given the importance of benefit security to any retirement system, we suggest that contributions to the System in excess of those presented in this report be considered.

This report has been prepared by actuaries who have substantial experience valuing public employee retirement systems. To the best of our knowledge this report is accurate, complete and fairly presents the actuarial position of the City of Farmington Hills Employees' Retirement System as of the valuation date. All calculations have been made in conformity with generally accepted actuarial principles and practices and with the Actuarial Standards of Practice issued by the Actuarial Standards Board and applicable State statutes. Rebecca L. Stouffer and James D. Anderson are members of the American Academy of Actuaries. These actuaries meet the Academy's Qualification Standards to render the actuarial opinions contained herein. The signing actuaries are independent of the plan sponsor.

Respectfully submitted,
Gabriel, Roeder, Smith & Company

Rebecca L. Stouffer, ASA, FCA, MAAA

James D. Anderson, FSA, EA, FCA, MAAA

SECTION A

EXECUTIVE SUMMARY

Executive Summary

1. Required Employer Contributions - Fiscal Year Beginning July 1, 2022

The required City contributions for each employment division are as follows:

Division	Required Employer Contribution	
	% of Payroll	\$ Based on Projected Payroll
General	N/A	\$ 2,178,109
Court	N/A	247,138
Police	33.58%	3,266,116
Fire	23.58	1,303,613

The General and Court groups are closed to new hires. As a result, we have calculated the employer contributions using a financing method that is appropriate for these circumstances.

2. Contribution Comparison

The table below compares the results of this valuation with the results of the 2020 actuarial valuation of the System.

Division	Required Contributions by Indicated Valuation Date	
	6/30/2020	6/30/2021
General	\$ 2,334,458	\$ 2,178,109
Court	289,436	247,138
Police	3,245,435	3,266,116
Fire	1,310,992	1,303,613
Total	\$ 7,180,321	\$ 6,994,976

3. 2021 Funding Position

This year valuation assets represent 76% of accrued liabilities compared to last year's valuation where the funded percent was 74%. If the market value of assets was used in the development of the System's funded percent, the System would be 86% funded as of June 30, 2021.

4. Reasons for Change

There are three general reasons why contribution rates change from one valuation to the next.

- 1) The first is a change in the benefits or eligibility conditions of the Plan. There were no benefit changes during 2021.
- 2) The second is a change in the valuation assumptions or methods used to predict future occurrences. There were no assumption or method changes during 2021.
- 3) The third is the difference during the year between the System's actual experience and what the assumptions predicted. This is discussed on the following page.

5. 2021 Plan Experience

System experience for the year ending June 30, 2021 was favorable overall. During the 2020-2021 plan year, the rate of investment return on System assets was higher than long term expectations. However, the market smoothing techniques used in this valuation recognize both current and prior investment experience and, as a result, the recognized rate of investment return for the year was 10.73%. Additional information related to the investment experience is shown on pages C-3 and C-4 of this report. Positive investment experience was partially offset by new retiree experience, more retirements with larger benefits than expected by assumptions. The net favorable experience contributed to the decrease in computed City contributions to the System.

6. Retiree Reserve Balance

In each valuation, we develop the value of anticipated future benefit payments to retired members and their beneficiaries. We then compare this liability to the reported assets in the Retirement Reserve Fund. The liability amounts and the reported reserves are shown below:

	<u>General/Court</u>	<u>Police</u>	<u>Fire</u>	<u>Total</u>
Retiree Liability	\$61,476,886	\$58,444,537	\$12,531,952	\$132,453,375
Retiree Reserve	<u>68,050,020</u>	<u>66,374,757</u>	<u>13,003,991</u>	<u>147,428,768</u>
Surplus	(6,573,134)	(7,930,220)	(472,039)	(14,975,393)

Since the value of assets held in the retirement reserve fund is sufficient to cover the value of the retiree liabilities as of June 30, 2021, no transfer is required.

7. Limitations of Funded Status Measurements

Unless otherwise indicated, a funded status measurement presented in this report is based on the actuarial accrued liability and the actuarial value of assets. Unless otherwise indicated, with respect to any funded status measurement presented in this report:

- The measurement is inappropriate for assessing the sufficiency of System assets to cover the estimated cost of settling the System's benefit obligations.
- The measurement is inappropriate for assessing the need for or the amount of future employer contributions.
- The measurement will produce a different result if the market value of System assets is used instead of the actuarial value of System assets.

8. Other

In light of the recent experience study, we recommend a review and update of the Board's funding policy to ensure consistency with the assumptions and methods adopted by the Board.

SECTION B

VALUATION RESULTS

Financial Objective

The financial objective of the Retirement System is to establish and receive contributions, expressed as a percentage of active member payroll (for open groups), which will remain approximately level from year to year and will not have to be increased for future generations of citizens. The contributions, when combined with present assets and future investment income, will be sufficient to meet the financial obligations of the fund to present and future retirees and beneficiaries. Your annual actuarial valuations determine how well the objective is being met.

The contribution requirements for the fiscal year beginning July 1, 2022 are presented on the following page.

General Implications of Contribution Allocation Procedure or Funding Policy on Future Expected Plan Contributions and Funded Status

Given the plan's contribution allocation procedure, if all actuarial assumptions are met (including the assumption of the plan earning 7.00% on the actuarial value of assets), it is expected that:

- (1) The employer normal cost contributions are expected to decrease due to the closure of the General and Court groups;
- (2) The unfunded actuarial accrued liabilities will be fully amortized after 22 years; and
- (3) The funded status of the plan will increase gradually towards a 100% funded ratio.

Contributions to Provide Benefits for the Fiscal Year Beginning July 1, 2022 Member and Employer Portions

Contributions for	% of Active Payroll			
	General	Court	Police	Fire
Normal cost of benefits:				
Age and service	\$ 537,502	\$ 172,538	17.02%	17.46%
Disability	3,718	1,028	0.17	0.18
Death before retirement	13,634	3,085	0.46	0.46
Stipend	826	229	0.05	0.05
Total	555,680	176,880	17.70	18.15
Member contributions				
Total	185,915	51,419	4.50	4.50
Future refunds	40,901	5,599	0.37	0.36
Available for pensions	145,014	45,820	4.13	4.14
Administrative expenses	126,281	15,400	1.09	1.09
Employer normal cost	536,947	146,460	14.66	15.10
Unfunded accrued liability payment	1,641,162	100,678	18.92	8.48
Computed employer contribution	\$2,178,109	\$ 247,138	33.58%	23.58%

Unfunded accrued liabilities were amortized over 18 years for the General and Court groups and over 22 years for the Police and Fire groups. A closed, level dollar amortization method was used for the General and Court groups, due to the closure of these groups to new employees. A closed, level percent of payroll amortization method was used for the Police and Fire groups due to the open nature of these groups.

Determination of Unfunded Accrued Liability as of June 30, 2021

	<u>General</u>	<u>Court</u>	<u>Police</u>	<u>Fire</u>	<u>Total</u>
A. Accrued Liability					
1. For retirees and beneficiaries	\$58,331,156	\$3,145,730	\$58,444,537	\$12,531,952	\$132,453,375
2. For vested terminated members	380,016	233,630	518,789	505,376	1,637,811
3. For present active members					
a. Value of expected future benefit payments	30,326,166	7,786,910	52,627,027	28,664,632	119,404,735
b. Value of future normal costs	3,551,228	1,306,167	16,222,428	9,317,794	30,397,617
c. Active member liability: (a) - (b)	<u>26,774,938</u>	<u>6,480,743</u>	<u>36,404,599</u>	<u>19,346,838</u>	<u>89,007,118</u>
4. Total	85,486,110	9,860,103	95,367,925	32,384,166	223,098,304
B. Valuation Assets	<u>67,832,263</u>	<u>8,752,885</u>	<u>68,299,964</u>	<u>25,474,528</u>	<u>170,359,640</u>
C. Unfunded Accrued Liability (A.4) - (B)	<u>17,653,847</u>	<u>1,107,218</u>	<u>27,067,961</u>	<u>6,909,638</u>	<u>52,738,664</u>
D. Funding Ratio: (B) / (A.4)	<u>79%</u>	<u>89%</u>	<u>72%</u>	<u>79%</u>	<u>76%</u>

Development of Experience Gain/(Loss) Period Ended June 30, 2021

Actual experience will never (except by coincidence) exactly match assumed experience. It is hoped that gains and losses will cancel each other over a period of years, but sizable year-to-year fluctuations are common. Detail on the derivation of the experience gain (loss) is shown below:

	All Groups Combined
(1) UAAL* at start of period	\$ 55,394,793
(2) Normal cost for period	3,849,965
(3) Actual contributions	7,602,653
(4) Interest accrual on (1), (2) and (3)	3,746,291
(5) Expected UAAL before changes: (1) + (2) - (3) + (4)	55,388,396
(6) Change in plan provisions	0
(7) Change in actuarial assumptions/methods	0
(8) Expected UAAL after changes: (5) + (6) + (7)	55,388,396
(9) Actual UAAL at end of period	52,738,664
(10) Gain/(loss): (8) - (9)	2,649,732
(11) Gain/(loss) as percent of actuarial accrued liabilities at start of period	1.22%

* *Unfunded Actuarial Accrued Liabilities*

Risk Commentary

The determination of the actuarial liability and the actuarially determined contribution requires the use of assumptions regarding future economic and demographic experience. Risk measures, as illustrated in this report, are intended to aid in the understanding of the effects of future experience differing from the assumptions used in the course of the actuarial valuation. Risk measures may also help with illustrating the potential volatility in the actuarial liability and the actuarially determined contribution that result from the differences between actual experience and the actuarial assumptions.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions due to changing conditions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period, or additional cost or contribution requirements based on the System's funded status); and changes in plan provisions or applicable law. The scope of an actuarial valuation does not include an analysis of the potential range of such future measurements.

Examples of risk that may reasonably be anticipated to significantly affect the plan's future financial condition include:

1. **Investment Risk** – actual investment returns may differ from the expected returns;
2. **Asset/Liability Mismatch** – changes in asset values may not match changes in liabilities, thereby altering the gap between the actuarial liability and assets and consequently altering the funded status and contribution requirements;
3. **Contribution Risk** – actual contributions may differ from expected future contributions. For example, actual contributions may not be made in accordance with the plan's funding policy or material changes may occur in the anticipated number of covered employees, covered payroll, or other relevant contribution base;
4. **Salary and Payroll Risk** – actual salaries and total payroll may differ from expected, resulting in actual future actuarial liability and contributions differing from expected;
5. **Longevity Risk** – members may live longer or shorter than expected and receive pensions for a period of time other than assumed; and
6. **Other Demographic Risks** – members may terminate, retire or become disabled at times or with benefits other than assumed resulting in actual future actuarial liability and contributions differing from expected.

The effects of certain trends in experience can generally be anticipated. For example, if the investment return since the most recent actuarial valuation is less (or more) than the assumed rate, the cost of the plan can be expected to increase (or decrease). Likewise, if longevity is improving (or worsening), increases (or decreases) in cost can be anticipated.

Risk Commentary (Concluded)

Plan Maturity Measures

Risks facing a pension plan evolve over time. A young plan with virtually no investments and paying few benefits may experience little investment risk. An older plan with a large number of members in pay status and a significant trust may be much more exposed to investment risk. Generally accepted plan maturity measures include the following:

	<u>2021</u>
Ratio of the market value of assets to payroll	9.50
Ratio of actuarial accrued liability to payroll	10.99
Ratio of actives to retirees and beneficiaries	0.67
Ratio of net cash flow to market value of assets	-5.3%

Ratio of Market Value of Assets to Payroll

The relationship between assets and payroll is a useful indicator of the potential volatility of contributions. For example, if the market value of assets is 5.0 times the payroll, a return on assets 5% different than assumed would equal 25% of payroll. A higher (lower) or increasing (decreasing) level of this maturity measure generally indicates a higher (lower) or increasing (decreasing) volatility in plan sponsor contributions as a percentage of payroll.

Ratio of Actuarial Accrued Liability to Payroll

The relationship between actuarial accrued liability and payroll is a useful indicator of the potential volatility of contributions for a fully funded plan. A funding policy that targets a funded ratio of 100% is expected to result in the ratio of assets to payroll and the ratio of liability to payroll converging over time. The ratio of liability to payroll may also be used as a measure of sensitivity of the liability itself. For example, if the actuarial accrued liability is 10 times the payroll, a change in liability 2% other than assumed would equal 20% of payroll. A higher (lower) or increasing (decreasing) level of this maturity measure generally indicates a higher (lower) or increasing (decreasing) volatility in liability (and also plan sponsor contributions) as a percentage of payroll.

Ratio of Actives to Retirees and Beneficiaries

A young plan with many active members and few retirees will have a high ratio of active to retirees. A mature open plan may have close to the same number of actives to retirees resulting in a ratio near 1.0. A super-mature or closed plan may have significantly more retirees than actives resulting in a ratio below 1.0.

Ratio of Net Cash Flow to Market Value of Assets

A positive net cash flow means contributions exceed benefits and expenses. A negative cash flow means existing funds are being used to make payments. A certain amount of negative net cash flow is generally expected to occur when benefits are prefunded through a qualified trust. Large negative net cash flows as a percent of assets may indicate a super-mature plan or a need for additional contributions.

Additional Risk Assessment

Additional risk assessment is outside the scope of the annual actuarial valuation. Additional assessment may include scenario tests, sensitivity tests, stochastic modeling, stress tests, and a comparison of the present value of accrued benefits at low-risk discount rates with the actuarial accrued liability.

SECTION C

SUMMARY OF BENEFIT PROVISIONS

Brief Summary of Basic Benefit Provisions (June 30, 2021)

Normal Retirement (No reduction for age)						
Group	Eligibility	Age Change	FAC ⁽¹⁾ Times Sum of		Maximum Benefit ⁽²⁾	Member Contributions
			Up To 25 Years	Over 25 Years		
AFSCME ⁽³⁾	60 & 8 or Sum of Age & Service equals 80 (minimum age 55)	None	2.80 %	1.00 %	75 %	4.50%
Teamsters, Exempt, and Court ^{(3),(4)}	60 & 8 or Sum of Age & Service equals 80 (minimum age 55)	None	2.80	1.00	80	4.50%
Dispatchers (Group D) ⁽³⁾	60 & 8 Sum of Age & Service equals 80 (minimum age 55)	Until Age 67 At Age 67	2.80 2.375	1.00 1.00	75 70	4.50%
Executive ⁽³⁾	60 & 8 or Sum of Age & Service equals 80 (minimum age 55)	None	3.00	1.00	80	4.50%
Police Command Hired before January 1, 2008	50 & 25 or 30 years of service with 25 years as Police Officer	None	3.00	1.00	80	4.50%
Police Command Hired after January 1, 2008	50 & 25 or 30 years of service with 25 years as Police Officer	None	2.80	1.00	80	4.50%
Fire Hired before July 1, 2008 and Police Patrol Hired before January 1, 2008	25 & Out	None	2.80	1.00	75	4.50%
Fire Hired after July 1, 2008 and Police Patrol Hired after January 1, 2008	50 & 25	None	2.25	1.00	60	4.50%

Early Retirement (Computed as regular retirement with an age reduction factor used.)		
Group	Eligibility	Reduction
Teamsters and Dispatchers	57 & 8	1/2 of 1% for each month by which retirement precedes age 60
AFSCME, Executive, Exempt, and Court	57 & 8	2/10 of 1% for each month by which retirement precedes age 60
Police Command	50 & 15 <50 & 25	2/10 of 1% for each month by which retirement precedes age 55 6/10 of 1% for each month by which retirement precedes age 50
Police Patrol	50 & 20	2.08/10 of 1% for each month by which retirement precedes age 55
Fire	50 & 20	2/10 of 1% for each month by which retirement precedes age 55

⁽¹⁾ Type of Final Average Compensation (FAC): highest 3 consecutive years out of last 10. FAC includes longevity pay for civilian members and longevity and holiday pay for Police, Fire and Dispatch members.

⁽²⁾ Maximum benefit is computed as a percent of FAC.

⁽³⁾ All Civilian groups have been closed to new hires.

⁽⁴⁾ Three Court employees are covered by the Executive group benefit structure.

Brief Summary of Basic Benefit Provisions (June 30, 2021)

Eligibility	Amount
Deferred Retirement	
General: 8 or more years of service. Benefit begins at age 60.	Computed as a regular or early retirement but based upon service and final average compensation at termination date.
Police and Fire: 15 or more years of service. Benefit generally begins at age 55.	

Non-Duty Death

10 or more years of service, or age 57 with 8 years of service.	Computed as a regular retirement but actuarially reduced in accordance with a 100% joint and survivor option.
---	---

Duty Death

No age or service requirements.	Surviving spouse pension computed as a duty disability retirement.
---------------------------------	--

Duty Disability

No age or service requirements.	General: 40% of compensation at time of disability, plus 10% of compensation (not to exceed 25% of total) for each unmarried child under age 18. Other disability payments offset. Police and Fire: 66-2/3% of final compensation.
---------------------------------	---

Defined Benefit Plan Eligibility

Employees hired after July 1, 2006 in the AFSCME, General and Executives employment groups are not covered by this defined benefit plan. Employees hired after January 1, 2007 in the Dispatch group and employees hired after January 1, 2008 in the Teamsters group are not covered by this defined benefit plan. Employees hired after September 1, 2015 in the Court division are not covered by this defined benefit plan. The System remains "open" to new Police Command Officers, Police Officers, and Fire Fighters.

Other

Eligible Retiree Health Care (RHC) Plan members who also participate in this plan may elect to receive a monthly pension stipend benefit ranging from \$200-\$400 per month and paid from the pension trust. This stipend benefit is paid in lieu of traditional RHC plan benefits. Police Patrol Officers hired after July 1, 2008, who are promoted to Command Officer will continue to receive the Police Patrol Officer pension benefits described on the prior page.

SECTION D

SUMMARY OF VALUATION METHODS AND ASSUMPTIONS

Valuation Methods

Actuarial Cost Method: Normal cost and the allocation of benefit values between service rendered before and after the valuation date were determined using an individual entry-age actuarial cost method having the following characteristics:

- (i) The annual normal costs for each individual active member, payable from the hire date to the date of retirement, are sufficient to accumulate to the value of the member's benefit earned; and
- (ii) Each annual normal cost is a constant percentage of the member's year by year projected covered pay.

Asset Valuation Method: The actuarial value equals:

- (a) Actuarial value of assets from the previous valuation, plus
- (b) employer and member contributions since the last valuation, minus
- (c) benefit payments and refunds since the last valuation, plus
- (d) estimated investment income at the assumed investment return, plus
- (e) portion of gain (loss) recognized in the current valuation.

For this purpose, gain (loss) is defined as the excess during the period of the investment return on the market value of assets over the expected investment income. 20% of the difference is recognized over a 5-year period in the actuarial value of assets. The actuarial value of assets is not permitted to deviate from the market value of assets by more than 20%.

The Funding Value of Assets is allocated between groups based on actual group experience and investment income such that each group's return equals the return for the System in total.

Amortization of Unfunded Actuarial Accrued Liabilities: Unfunded actuarial accrued liabilities were amortized by level percent-of-payroll contributions over 22 years for the Police and Fire groups. The period is reduced with each annual actuarial valuation. The amortization method was first used for the June 30, 2019 actuarial valuation. Active member payroll was assumed to increase 3.0% for the purpose of determining the level-percent contributions.

A level dollar amortization method was used for the General and Court groups. The amortization period was 18 years for the General and Court groups. The period is reduced with each annual actuarial valuation. This amortization period was first used for the General and Court groups in the June 30, 2019 actuarial valuation.

Actuarial Assumptions Used for the Valuation

Investment Return (net of investment expenses): 7.00% per year compounded annually. This rate consists of a real rate of return of 4.00% a year plus a long-term assumed rate of wage inflation of 3.00% per year.

This assumption is used to equate the value of payments due at different points in time and was first used for the June 30, 2019 valuation. Approximate rates of investment return, for the purpose of comparisons with assumed rates, are shown below. Actual increases in average active member pay are also shown for comparative purposes.

	Period Ended June 30,				
	2021	2020	2019	2018	2017
Rate of Investment Return (Recognized on Valuation Assets)	10.7%	4.3%	4.3%	6.5%	7.0%

These rates of return should not be used for measurement of an investment advisor’s performance or for comparisons with other systems.

Pay Projections: These assumptions are used to project current pays to those upon which benefits will be based. The assumptions were first used for the June 30, 2019 valuation.

Annual Rate of Pay Increase

Years of Service	General and Court Members		
	Base (Economic)	Merit & Longevity	Total
1 to 5	3.0%	4.0%	7.0%
6 to 10	3.0%	2.0%	5.0%
thereafter	3.0%	1.0%	4.0%

Annual Rate of Pay Increase

Years of Service	Police Members			Fire Members		
	Base (Economic)	Merit & Longevity	Total	Base (Economic)	Merit & Longevity	Total
1	3.0%	20.0%	23.0%	3.0%	17.0%	20.0%
2	3.0%	15.0%	18.0%	3.0%	12.0%	15.0%
3	3.0%	7.0%	10.0%	3.0%	12.0%	15.0%
thereafter	3.0%	1.0%	4.0%	3.0%	1.0%	4.0%

If the number of active members (in the open Public Safety groups) remains constant, the total active member payroll is expected to increase 3.0% annually, the base portion of the individual pay increase assumptions. This increasing payroll was recognized in amortizing unfunded actuarial accrued liabilities for the Police and Fire groups.

Changes actually experienced in pay have been as follows:

	Period Ended June 30,				
	2021	2020	2019	2018	2017
Average Increase in Pay@	4.9%	4.6%	4.2%	4.0%	4.3%

@ Excludes new hires and terminations.

The mortality tables (a risk assumption) used in this valuation are described below:

General and Court

- **Healthy Pre-Retirement:** The Pub-2010 Amount-Weighted, General, Employee, Male and Female tables, with future mortality improvements projected to 2025 using scale MP-2018.
- **Healthy Post-Retirement:** The Pub-2010 Amount-Weighted, General, Healthy Retiree, Male and Female tables, with future mortality improvements projected to 2025 using scale MP-2018.
- **Disability Retirement:** The Pub-2010 Amount-Weighted, General, Disabled Retiree, Male and Female tables, with future mortality improvements projected to 2025 using scale MP-2018.

Police and Fire

- **Healthy Pre-Retirement:** The Pub-2010 Headcount-Weighted, Safety, Employee, Male and Female tables, with future mortality improvements projected to 2025 using scale MP-2018.
- **Healthy Post-Retirement:** The Pub-2010 Headcount-Weighted, Safety, Healthy Retiree, Male and Female tables, with future mortality improvements projected to 2025 using scale MP-2018.
- **Disability Retirement:** The Pub-2010 Headcount-Weighted, Safety, Disabled Retiree, Male and Female tables, with future mortality improvements projected to 2025 using scale MP-2018.

80	9.70	11.49	8.83	10.71	8.78	9.89

*The Pub-2010 life expectancies shown above were based on a generational projection of mortality rates to the year 2025 using the MP-2018 projection scale and sample ages as of the valuation date.

75% of deaths are assumed to be non-duty for the General and Court groups, while 50% of deaths are assumed to be non-duty for the Police and Fire groups.

These tables were first used for the June 30, 2019 valuation of the System.

Rates of Retirement: These rates are used to measure the probability of eligible members retiring during the next year. Early retirement rates do not apply to members eligible for regular retirement.

Retirement Ages	Percent of Eligible Active Members Retiring				
	General	Court	Police Command	Years of Service	Police Command
50			30%	25	
51			30	26	
52			30	27	
53			30	28	
54			30	29	
55	30%	20%	20	30	40%
56	25	15	15	31	40
57	25	15	15	32	40
58	25	15	15	33	40
59	25	15	15	34	40
60	25	20	100	35	100
61	25	25			
62	30	30			
63	20	20			
64	25	25			
65	25	25			
66	30	30			
67	30	30			
68	30	30			
69	30	30			
70	100	100			

The Court and Police Command retirement rates were first used in the June 30, 2019 valuation.

Retirement Ages	Percent of Eligible Active Members Retiring			
	Police Patrol Hired After 1/1/2008 and Fire Hired After 7/1/2008	Years of Service	Police Patrol Hired Before 1/1/2008	Fire Hired Before 7/1/2008
50	30%	25	30%	30%
51	30	26	30	30
52	30	27	30	30
53	30	28	30	30
54	30	29	30	30
55	20	30	100	100
56	20			
57	20			
58	20			
59	20			
60	100			

The incidence of retirement for the Fire members is assumed to be 100% at age 62.

The service based retirement rates shown above for patrol officers hired before 1/1/2008 were first used in the June 30, 2019 valuation.

Percent of Eligible Active

Members Retiring

(Early Retirement)

30		4.40	4.40	2.50	2.50
35		3.90	3.90	1.00	1.50
40		3.40	3.40	0.70	0.70
45		3.00	3.00	0.50	0.50
50		2.00	2.00	0.50	0.50
55		1.40	1.40	0.50	0.50
60		1.40	1.40	0.50	0.50

The Police rates were first used for the June 30, 2019 valuation.

Rates of Disability: These rates represent the probabilities of active members becoming disabled.

Sample Ages	Number of Disabilities Per 100 Eligible Members
20	0.01
25	0.02
30	0.04
35	0.07
40	0.12
45	0.19
50	0.28
55	0.40
60	0.57

These rates were first used for the December 31, 1993 valuation.

Load for Administrative Expenses: Administrative expenses used in the contribution determination are based on the average dollar amount over the last 6 years (a rolling period), ending on the valuation date one year preceding the current valuation date. This flat dollar administrative expense load is allocated between the General group (closed), the Court group (closed), and the remaining two open groups based on the funding value of assets as of the administrative expense calculation date. The flat dollar portion of the administrative expense allocated to the two open groups is then converted to a percent of pay based on the combined projected fiscal year payroll for the open groups.

Pension Stipend Benefit Election: Ten percent of eligible active RHC plan members are assumed to elect cash payments (the pension stipend).

Miscellaneous and Technical Assumptions

Marriage Assumption:	100% of males and 100% of females are assumed to be married for purposes of death-in-service benefits. Male spouses are assumed to be three years older than female spouses.
Pay Increase Timing:	Beginning of (Fiscal) year.
Decrement Timing:	Decrements of all types are assumed to occur mid-year.
Eligibility Testing:	Eligibility for benefits is determined using the age nearest birthday and the service nearest whole year on the date the decrement is assumed to occur.
Decrement Relativity:	Decrement rates are used directly from experience, without adjustment for multiple decrement table effects.
Decrement Operation:	Disability and mortality decrements do not operate during the first 5 years of service. Disability also does not operate during retirement eligibility.
Service Credit Accruals:	It is assumed that members accrue one year of service credit per year.
Option Factors:	Factors for optional forms of payment (option factors) are based upon 7.0% interest of the: General and Court: Pub-2010 Amount-Weighted, General, Healthy Retiree, Male and Female tables, with future mortality improvements projected to 2025 using scale MP-2018 with an 50% Male and 50% Female Unisex Blend. Police and Fire: Pub-2010 Headcount-Weighted, Safety, Healthy Retiree, Male and Female tables, with future mortality improvements projected to 2025 using scale MP-2018 with an 90% Male and 10% Female Unisex Blend.
Incidence of Contributions:	Contributions are assumed to be received continuously throughout the year based upon the computed percent of payroll shown in this report, and the actual payroll payable at the time contributions are made.
Normal Form of Benefit:	The normal form of benefit is a straight life annuity.
Benefit Service:	Exact fractional service is used to determine the amount of benefit payable.
Loads:	Active member liabilities were loaded to account for subsidized annuity withdrawal and promotions from the Police Patrol to Command units as follows: General: 7.0% Court: 5.0% Police: 10.0% Fire: 13.0%
Forfeiture Assumption:	General members who terminate close to retirement were assumed to elect a deferred retirement while those terminating with less service were assumed to elect a refund of their contributions in lieu of deferred retirement benefits. All non-General members were assumed to elect a deferred retirement benefit.

Glossary

Actuarial Accrued Liability - The difference between (i) the actuarial present value of future plan benefits, and (ii) the actuarial present value of future normal cost. Sometimes referred to as "accrued liability" or "past service liability." Under the actuarial cost method used the "AAL" differs somewhat from the value of future payments based on benefits earned as of the valuation date.

Accrued Service - The service credited under the plan that was rendered before the date of the actuarial valuation.

Actuarial Assumptions - Estimates of future plan experience with respect to rates of mortality, disability, retirement, investment income and salary increases. Decrement assumptions (rates of mortality, separation and retirement) are generally based on past experience, often modified for projected changes in conditions. Economic assumptions (salary increases and investment income) consist of an underlying rate appropriate in an inflation-free environment plus a provision for a long-term average rate of inflation.

Actuarial Cost Method - A mathematical budgeting procedure for allocating the dollar amount of the "actuarial present value of future plan benefits" between the normal costs to be paid in the future and the actuarial accrued liability. Sometimes referred to as the "actuarial funding method."

Actuarial Equivalent - Benefits whose actuarial present values are equal.

Actuarial Present Value - The amount of funds presently required to provide a payment or series of payments in the future. It is determined by discounting the future payments at a predetermined rate of interest, taking into account the probability of payment.

Amortization - Paying of an interest-bearing liability by means of periodic contributions of interest and principal, as opposed to a lump sum payment.

Experience Gain (Loss) - A measure of the difference between actual experience and experience anticipated by a set of actuarial assumptions during the period between two actuarial valuation dates, in accordance with the actuarial cost method being used.

Normal Cost - The annual cost assigned, under the actuarial funding method, to current and subsequent plan years. Sometimes referred to as "current service cost." An amortization payment toward the unfunded actuarial accrued liability is in addition to the normal cost.

Reserve Account - An account used to indicate that funds have been set aside for a specific purpose and are not generally available for other uses.

Unfunded Actuarial Accrued Liability - The difference between the actuarial accrued liability and valuation assets. Sometimes referred to as "unfunded accrued liability."

Valuation Assets - The value of current plan assets recognized for valuation purposes.
